Project III Addenda

List of Deliverables

16 November-The Need
- A **two paragraph** document (any document longer than one page will not be accepted)
  - -paragraph one: a statement of the design problem you have chosen
  - -paragraph two: description and contact information for your user
- You do **not** turn in, but should complete, a project schedule by this point.
- A **5 minute** presentation documenting visually the context you have chosen and that you have spoken with your user.

5 December-The Prototypes
- **Ten** pages (8.5" x 11") of <u>thumbnail</u> sketches showing design ideas, tools used in the job your belt is for, issues of movement and appearance for the user, environment in which job is performed, etc.
- **Five** presentation-level concept drawings of five <u>different</u> belt solutions
- A **5 minute** presentation documenting the tasks involved in the work for which your belt is designed, the prototypes you have made, and the testing you have done.

14 December-The Solution
- A final ID model
- One colored paper rendering of your design, mounted on a board
- Orthographic control drawings of your design with overall dimensioning
- Your design log. This must be in a bound format; loose papers or papers in folders will **not** be accepted. Your log should document your design process, interviews with your user, testing, schedules, task lists, budgets, and research.
- A **10 minute** presentation of your design problem, process, and solution. Your presentation will need to document testing and feedback on your design from your user.

Enjoy!
